

## TIPS ON PHOTOGRAPHING YOUR ARTWORK AND PREPARING DIGITAL IMAGES FOR ENTRY

### Photographing:

1. Use a digital camera of at least 10 megapixels
2. Set camera's resolution to highest setting (large)
3. Shoot several photos of your paintings, using a tripod if you have one
4. Aim the camera at the center of the piece
5. Place the painting so its surface is parallel to the camera lens
6. Be sure to square the image with the plane of the camera lens. Use an easel or attach the painting to a board or wall to keep it steady. Using a white or black background is helpful.
7. Do not use a flash; you will get good results if you shoot outdoors in the shade. Avoid shooting at dawn or dusk; the warm lighting will alter your artwork's colors.
8. Import images into your computer.
9. Use a photo-editing software such as Adobe Photoshop Elements. Most computers have a photo editing program. Google has a downloadable program "Picasa"
10. Save your original photograph; make a duplicate.
11. Working from your duplicate image, straighten or rotate your image if necessary
12. Use the cropping tool to crop your image. Only the painting should show, as it will when it is matted.
13. Do not adjust the color, unless it is necessary to make the image look more like the painting.
14. In the Image Size dialog box, reduce your image to 1800 pixels on the longest side. Be sure the box to constrain proportions is checked if applicable. You must also change the dpi (dots per inch or pixels per inch) to 300.
15. Rename your saved file. Image #, name, then the title of painting. (You may abbreviate the title). Example: a painting by Mary Smith called "The Storm" would be 1Smith-Storm.jpg.
16. Save image as .jpg to maximum quality.
17. Email the image as an attachment (do not embed it in the body of the text) or save image onto a CD for show submission as specified in the prospectus. Some computer e-mail programs, such as MacIntosh, automatically re-size photos to 72 dpi if you attach them to e-mail as a "picture". This can be avoided by attaching images as "files." If the image is manipulated to not faithfully show the painting, the painting will be disqualified.

### Digital Requirements:

Image size: 1800 pixels on the longest side

Resolution: 300 dpi

File Format: jpeg – highest quality

File Name Protocol: #, last name, hyphen, title.

Eg. 1Smith-Storm.jpg
